A. Testimonial Comment: Sujatha Kumar, Founder & CEO, Dsider Inc.

Version 1 — Concise Case Study

*"We've been collaborating with Adya.ai since mid-2025 as part of our multi-agentic framework at Dsider.app. Their team integrated an enterprise search agent alongside our research and data analyst agents — supporting the development and successful deployment of a well-organised, vetted knowledge base at the core of our Biointelligence System. Adya's team has shown consistency, technical capability, and a strong collaborative approach. They've been steady partners throughout."***— Sujatha Kumar, Founder & CEO, Dsider Inc.**

Version 2 —

"Since mid-2025, Adya.ai has been an integral part of our multi-agentic framework at Dsider.app. Their enterprise search agent integrates seamlessly alongside our research and data analyst agents, enabling tighter integration and faster iteration across our data workflows — while supporting the vetted knowledge base central to what Dsider is building. Our Biointelligence System is a complex, demanding area, and it required Adya to deploy multiple agents in parallel with our ongoing research. They handled this effectively and have been steady partners throughout. Shayak brings good insight and knowledge, and the team's collaborative approach in aligning their systems with our evolving framework has been genuinely encouraging."
